

# Introducing five new projects to compete for electricity production using renewable energy

Projects with a total capacity **3300** MW

Total capacity of wind energy  
production projects at this stage

**1800**  
MW

Yanbu

**700**  
MW

Al Ghat

**600**  
MW

Waad Al Shamal

**500**  
MW

**1500**  
MW

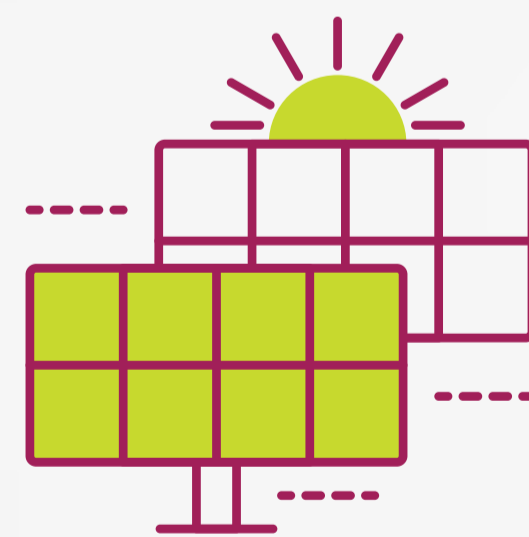

Total capacity of solar energy  
production projects at this stage

Al Hinakiyah

**1100**  
MW

Tubarjal

**400**  
MW

The launch of these projects within the national renewable energy program comes as part of the kingdom's goals to reach the optimal energy mix, with 50% of electricity production from renewable energy resources and 50% from natural gas, which displaces liquid fuels used to produce electricity by 2030.
